**Safco Influx™ LED Curing Light**

The perfect combination of ergonomics, functionality and value. Influx emits light at a typical output of 1,400W/cm2 and needs only 5 seconds to cure most resin-based composites. Incorporates a 5W blue LED producing 440 to 480nm to polymerize all comphorquinone (CQ) containing products and most resin-based composites in 5 seconds.

Features:

- Digital timer display with multiple mode selection: Boost (fast curing) and ramp up (soft start).
- Two-button easy operation.
- Slim, lightweight, ergonomic design weighing only 155g.
- Rechargeable lithium battery capable of 200 – 10-second curing cycles before a recharge is needed.
- Allows for corded operation if needed.
- Accepts all Vector light guides for versatility.

<b>Broadband wavelength</b>	440 to 480 nm
<b>Max. Light Intensity</b>	1,400 mW/cm2
<b>Max. Curing time (Composites)</b>	5 Sec. (most composites)
<b>Preset programs</b>	2
<b>Power supply</b>	Lithium-ion battery: Capacity: 30 min (200 -10 sec curing). Power cord also included
<b>Manufacturer's warranty</b>	1 year

**Safco SureStitch™ Sutures**

Extra sharp cutting edges on the needle reduce tissue drag and produce a precise, smooth penetration with minimal trauma. Needle channel is fitted to the specific size of the suture material. Excellent handling and tying characteristics.

Promo

20% Off!

Sale ends June 30.

**Needle types**

- *Reverse cutting:* Triangular point with cutting edge on the outer curvature.
- *Precision reverse cutting:* Triangular point with cutting edge on the outer curvature, plus precision-honed for added sharpness.

**Plain gut (catgut)**

Made of first quality raw material, catgut has extremely high tensile strength. Every strand is precision polished to a uniform diameter, permitting smooth and secure knotting.

**Black braided silk**

Noncapillary silk has excellent handling and tying characteristics. Modern braiding technique provides a uniform smooth surface and a greater tensile strength.

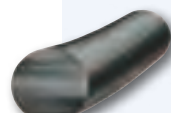

**Chromic gut (catgut)**

Produced with the same precision and quality materials as plain gut, plus treated with chromic acid salts to decrease tissue reactivity and provide a slower absorption rate.

**Nylon black monofilament**

A non-absorbable polyamide suture with characteristically high tensile strength. The uniform smooth surface permits easy passage through tissue.
