Prime&Bond active®
Universal adhesive

NEW

Promo
Buy 3, Get 1 FREE!

Offer ends June 30. Free item will be of equal or lesser value to lowest price purchase item. Limit 5 redemptions per offer per clinician. Free goods will ship direct from the manufacturer.

More confident restorations begin with a durable, reliable adhesive bond across varying moisture levels. Prime&Bond active adhesive is formulated to actively guard against leading causes of adhesive failure, even when dentin is overly wet or dry.

A critical step in the Class II restoration

Adhesive placement plays a vital role in the success of any Class II restoration. When used with a bulk-fill flowable like SDR® flow+, Prime&Bond active adhesive helps to achieve gap-free restorations with high bond strength, efficiency and predictability.

Shear bond strength

Prime&Bond active adhesive helps to ensure complete coverage and penetration even on overly wet or dry dentin. The result is a strong, reliable bond that protects against the leading causes of adhesive failure.

Complete coverage

Inherent surface tension prevents other adhesives from spreading easily across the surface of the cavity. Prime&Bond active adhesive spreads actively, minimizing the risk of dry spots that can cause post-operative sensitivity. It's yellow color during application improves visibility and the low film thickness and thin adhesive layer means it becomes virtually invisible after light curing.

Active mixing

Prime&Bond active adhesive breaks the surface tension of the water in the prep, actively blending with it. Excess water then evaporates with the alcohol-based co-solvent to form a gap-free layer.

Low film thickness

Prime&Bond active adhesive actively spreads to create a thin, uniform adhesive layer with low viscosity that helps to prevent misdiagnosis caused by pooling of thick adhesive in the corners of the proximal box.

Virtually no sensitivity

On average, 10%-15% of posterior composite restorations result in post-operative sensitivity. In a user survey with more than 2,000 restorations, the incidence of post-operative sensitivity was less than 0.2%.

Midwest® Energo™
Electric handpiece attachments

Energo is a completely redesigned line of attachments.

- Compatible with Midwest E Electric Handpiece System.
- Safe Head Technology: Double-wall cap stays cool for patient protection.
- Unmatched Quiet: Thanks to a patented 4x2 nozzle spray system.
- Easy: Innovative chuck reduces push button force required for bur changes.
- Sustainability: Ecological design and new packaging provide reduced CO2 emissions across the life-cycle of the product.

T1 Energo

- Durable: New gear design and DLC-coated bearings for reduced abrasion/wear.
- Ergonomic: Smaller head, improved handshape for better visibility and outstanding grip; smaller gap between grip and connection.
- Titanium Sleeve: Among the lightest handpieces in the class.
- Lightest weight and longest warranty (3-years).

T2 Energo

- Durability: New gear design for reduced abrasion and wear.
- Ergonomic: Smaller head offers greater visibility; improved handshape for exceptional grip.
- Lower price and 2-year warranty.

Safe 'N' Sure Deluxe

Phosphor plate barrier envelopes

New Safe'n'Sure Deluxe Wall Dispenser is a single use dispenser that can be mounted on your plate processor or on a nearby wall. Easily dispenses one envelope at a time, so you can bag your plates just as they come out of the plate reader. The dispenser comes with everything you need.

- Clear side aids in accurate plate positioning.
- EZ-Glide extended tab directs the plate into the bag; as the tab is removed, the envelope virtually seals itself.
- Tear-away seam provides fast, efficient removal of the plate for processing.
